

The do not call list for NJ has been the best legislation for quality of life. I do not have to worry on people calling when I am not home and my children answer the phone and do not know what to say. Our family life has greatly improved during the afternoon and evenings we have quality time together not answering the phone. DO NOT CHANGE the way NJ has the do not call list. Also I signed my mother up on the do not call list, now she does not get solicitors calling her and she is much more comfortable and has a sense of security that she did not have before the do not call list went into effect.
